Applied Research & Insights Specialist with 5+ years' experience delivering mixed-methods research across academic, commercial, and policy contexts. PhD-trained in Social Science and International Business, with strong skills in qualitative interviews, text analysis, survey research, network analysis, and stakeholder-facing insight delivery. Experienced in translating complex information into clear, actionable recommendations, with growing expertise in AI content evaluation, source verification, fact-checking, and Mandarin-English research review.

CORE SKILLS

Research & Insight

- Mixed-methods research design (qualitative & quantitative)
- Survey design, questionnaire development & data collection
- Qualitative interviews & thematic analysis
- Insight generation, synthesis & strategic recommendations

Stakeholder & Client Delivery

- Translating complex analysis into decision-ready insights
- Insight presentations, reporting & storytelling
- Cross-cultural stakeholder engagement
- Supporting client-facing research delivery

Analytical Tools & Methods

- Social Network Analysis (UCINET, R)
- Statistical analysis (R, Excel)
- Qualitative analysis (NVivo)
- Data visualisation & reporting

AI & Research Evaluation Skill

- AI-generated content evaluation
- AI response quality review
- Source verification and fact-checking
- Mandarin-English language evaluation

Languages

- Mandarin Chinese (Native)
- English (Fluent)

PROFESSIONAL EXPERIENCE

Applied Researcher / Visiting Scholar (PhD Project) | University of Greenwich | Sep 2018 – Nov 2024

Led a large-scale mixed-methods research project analysing business networks and decision-making in international markets, combining qualitative and quantitative approaches to generate strategic insights. Designed and delivered a large-scale mixed-methods research project - Guanxi Networks within the Chinese Exhibition Industry: Differences in International Exposure, analysing international business network dynamics within the exhibition industry, generating insights into relationship-building, market collaboration, and strategic decision-making.

Key achievements:

- Designed and delivered an end-to-end research project (design, data collection, analysis, reporting)
- Conducted **45+ stakeholder interviews**, uncovering patterns in business relationships and decision-making
- Designed and implemented **ego-network surveys**, generating structured data on business connections and network behaviour
- Conducted **non-participant observations** to capture real-world industry practices and contextual insights
- Analysed qualitative and quantitative datasets, applying Social Network Analysis to identify structural drivers of business behaviour
- Generated **actionable insights on partnership strategies, market entry and network positioning**
- Presented findings to academic and professional audiences, translating complex analysis into clear, practical recommendations

Selected research impact

- Identified how network structures influence business decision-making, informing partnership and market entry strategies
- Demonstrated the role of brokerage in gaining a competitive advantage in international markets
- Developed a model linking international exposure to network behaviour, with relevance to digital and platform-based industries
- Translated complex social network analysis into practical business insights for non-technical audiences

Research Assistant | University of Greenwich | Apr 2023 – Oct 2023

Supported research on the strategic development of high-growth SMEs (“Small Giant” companies).

Key contributions:

- Conducted targeted international research and data synthesis on business strategy and innovation
- Supported comparative analysis of company networks and growth models
- Contributed to evidence-based insights informing research outputs and strategic interpretation

Teaching Assistant | University of Greenwich | 2019–2023

- Delivered tutorials and workshops on international business and research methods
- Supported students with research design, data analysis, and project development
- Communicated complex concepts clearly to diverse audiences
- Strengthened facilitation, presentation and stakeholder communication skills

Exhibition Planner | DEMAGE International Messe Ltd | 2017 – 2018

Worked on international exhibition and trade show projects, supporting market positioning and event strategy.

Key achievements:

- Led client proposal development and consultation for large-scale exhibitions and industry events.
- Secured and delivered a ¥3 million bid for the Hanas LNG Exhibition Hall project (2017) in China.
- Contributed to the planning and delivery of the Biological Medicine Exhibition Hall project (2017) in the Zhengzhou Airport Economy Zone, supporting concept development and project coordination.
- Conducted pre-event market and industry research to support event positioning, audience targeting, and client decision-making.

Event Planner | BroadMesse International | 2016 – 2017

Supported the planning and delivery of international exhibition and trade show projects across technology, energy and travel sectors.

Key responsibilities:

- Conducted pre-event market research and competitor analysis to inform exhibition positioning and marketing strategies.
- Analysed marketing and audience data to support client decision-making and event promotion strategies.
- Developed project proposals and presentations for clients, communicating event concepts, branding strategies and delivery plans.
- Supported branding, PR activities and marketing campaigns for international exhibitions.
- Coordinated project timelines, suppliers and logistics to ensure successful event delivery.

Selected projects:

SECON 2017 – HIKVISION Exhibition (South Korea); SNEC Shanghai 2017 – SUNGROW Exhibition; CES USA 2017 – CSOT Exhibition; China International Travel Mart 2016 – Alibaba Exhibition
